CCAF / STORYBOARD PLAN

Handle the Complaint — Learning Journey

METADATA

Course	Handling Customer Complaints	**Module**	Handle the Complaint
Learning approach	Scenario-based learning journey using CCAF	**Delivery**	Responsive e-learning: laptop + mobile
Target learners	Newly hired client-facing employees at Bank Negara Malaysia	**Scenario setting**	Bank branch — customer service counter
Employee character	Hakim — newly hired male client-facing employee; professional, attentive, still developing confidence in complaint handling.	**Customer character**	Melissa — female customer; first-time complainant. Concerned and increasingly firm, but not aggressive or unreasonable.
Customer situation	Melissa notices RM60 missing from her account. She does not initially know why.	**Transaction evidence**	Two RM30 DuitNow transactions are shown as failed; a third transaction is successful. The reason for the deductions is not immediately established.
Story principle	The learner follows Hakim through one realistic customer interaction. Decisions are practice opportunities, not a final exam.	**CCAF use**	Context → Challenge → Activity → Feedback, with action/consequences/judgment used to make feedback instructional.

STORYBOARD

The storyboard uses CCAF for scenario-based practice. Each choice includes ACTION, CONSEQUENCES, and JUDGMENT so feedback explains the learner's reasoning rather than simply revealing a correct answer.

Screen ID	Description	Voice-Over / Dialogue	Suggested Visual	CCAF / Learning Interaction	ACTION / CONSEQUENCES / JUDGMENT	Navigation / Branching
IA-01	Opening. Morning at the bank branch. Hakim is working at the customer service counter. Melissa approaches after waiting for her turn. She looks concerned but composed.	Hakim: “Good morning. How may I assist you today?” Melissa: “Good morning. I noticed that RM60 is missing from my account. I'm not sure why.” Hakim: “Alright. Let me check that for you.” Melissa: “Okay.”	Establishing shot of the branch, followed by a medium two-shot of Hakim and Melissa at the counter.	CONTEXT — The learner enters the workplace situation without being told what kind of customer interaction this is.	—	—
IA-02	Hakim begins checking Melissa's account information. Melissa waits at the counter.	Hakim: “May I have a moment to check the recent transactions?” Melissa: “Sure.”	Over-the-shoulder view of Hakim reviewing a generic transaction screen. No sensitive information.	ABSORB — Learner observes the employee gathering information before responding.	—	Continue → IA-03
IA-03	The transaction history shows two failed DuitNow transactions and one successful transaction. Each failed transaction shows RM30. Hakim now knows how the RM60 relates to the transaction history, but he does not yet know why the deductions occurred.	On-screen record: RM30 — Failed RM30 — Failed RM30 — Successful Hakim: “I can see two unsuccessful DuitNow transactions of RM30 each, and a third transaction that was successful.” Melissa: “Yes. I tried again after the first two didn't go through.”	Transaction history appears beside Hakim. Highlight the two failed RM30 transactions, then show the successful third transaction.	ABSORB — Information is progressively revealed rather than given to the learner upfront.	—	Continue → IA-04
IA-04	Hakim pauses. He has identified the transaction pattern, but he needs to understand what Melissa is actually experiencing.	VO: “Hakim has found part of the picture. Before deciding what to do next, what should he focus on?”	Hakim reviewing the screen, then looking back at Melissa.	CHALLENGE — Learner considers whether to jump immediately to a solution or understand the customer's concern first.	—	Select response

Screen ID	Description	Voice-Over / Dialogue	Suggested Visual	CCAF / Learning Interaction	ACTION / CONSEQUENCES / JUDGMENT	Navigation / Branching
IA-05	Three plausible approaches appear.	A. “Explain the transaction immediately based on what is visible.” B. “Ask Melissa to explain what happened from her perspective.” C. “Tell Melissa that the issue needs to be referred to another team.”	Three large touch-friendly response cards.	ACTIVITY / DO — Learner chooses Hakim's next action.	A — ACTION: Hakim explains before understanding the full situation. CONSEQUENCE: He may make assumptions because the transaction record does not explain why the deductions occurred. JUDGMENT: The response moves too quickly toward an explanation. B — ACTION: Hakim invites Melissa to explain what happened. CONSEQUENCE: He can gather the customer's experience before deciding what to do. JUDGMENT: This is the stronger approach because it keeps the focus on understanding first. C — ACTION: Hakim refers the issue immediately. CONSEQUENCE: Another team may eventually be needed, but early referral can interrupt ownership before the concern is understood. JUDGMENT: The response is premature.	A/B/C → choice-specific feedback → IA-06
IA-06	Hakim asks Melissa to explain what happened.	Hakim: “Can you tell me what happened when you made the transfers?” Melissa: “I tried to make the transfer twice, but both attempts didn't go through. I tried again later, and the third one worked.” Hakim: “Alright. Thank you.”	Two-shot. Hakim listens without interrupting. Melissa explains the sequence.	ABSORB + DO — Learner sees an example of appropriate questioning and active listening following the previous decision.	—	Continue → IA-07
IA-07	Melissa remains concerned. Hakim now has enough information to recap the situation, but he should not assume what outcome she wants.	Melissa: “I just want to understand what happened to the RM60.” Hakim considers how to respond.	Melissa speaks while Hakim listens. The transaction history remains subtly visible in the background.	CHALLENGE — Learner distinguishes between what Melissa has actually requested and what Hakim might assume she wants.	—	Continue → IA-08

Screen ID	Description	Voice-Over / Dialogue	Suggested Visual	CCAF / Learning Interaction	ACTION / CONSEQUENCES / JUDGMENT	Navigation / Branching
IA-08	Hakim chooses how to recap his understanding.	A. “So you want us to refund the RM60 because the first two transfers failed?” B. “Let me confirm: the first two transfers failed, RM30 was deducted from each, and you want clarification on why the RM60 was deducted. Is that correct?” C. “I can see the two failed transactions. I'll check why the system charged you RM60.”	Three response cards.	ACTIVITY / DO — Practice accurate recapping and avoiding assumptions about the customer's desired outcome.	A — ACTION: Hakim assumes Melissa wants a refund. CONSEQUENCE: He may move toward a solution the customer has not requested. JUDGMENT: The response does not accurately establish the customer's need. B — ACTION: Hakim confirms the sequence, the customer's experience, and what she wants clarified. CONSEQUENCE: Melissa has an opportunity to correct any misunderstanding before the case progresses. JUDGMENT: This is the strongest response because it confirms understanding without making assumptions. C — ACTION: Hakim moves directly toward investigation. CONSEQUENCE: He has not first confirmed that he has understood Melissa's concern correctly. JUDGMENT: The response is action-oriented but skips an important understanding step.	A/B/C → choice-specific feedback → IA-09
IA-09	Choice-specific feedback concludes and the story continues. Hakim responds to Melissa after confirming the concern.	Hakim: “Thank you for clarifying that. I'll check what happened with the two unsuccessful transactions.” Melissa: “Okay.”	Two-shot. Melissa remains concerned but appears more comfortable because Hakim has understood her concern.	FEEDBACK + CONNECT — Learner connects accurate understanding and recapping to the next handling step.	—	Continue → IA-10

Screen ID	Description	Voice-Over / Dialogue	Suggested Visual	CCAF / Learning Interaction	ACTION / CONSEQUENCES / JUDGMENT	Navigation / Branching
IA-10	Hakim checks the available information further. He confirms the two deductions but cannot yet establish why they occurred.	Hakim: “I can confirm the two RM30 deductions, but I don't have enough information yet to explain why they were made.” Melissa: “So you can't tell me yet?” Hakim: “Not yet. I need to check further before I can give you a proper explanation.”	Hakim at the counter with the transaction record. Melissa listens.	CONTEXT — The complaint cannot be resolved immediately. This creates a realistic workplace challenge.	—	Continue → IA-11
IA-11	The learner is briefly shown the principle behind Hakim's response.	VO: “When the answer is not yet available, Hakim should not guess or make a promise he cannot support. He should be clear about what he knows and what still needs to be checked.”	Simple visual: What I know / What I need to check / What I can tell the customer now.	ABSORB — Short instructional explanation embedded within the story.	—	Continue → IA-12
IA-12	Hakim records the complaint and checks the next steps. The learner sees that complaint ownership begins when the complaint is received.	On-screen: Complaint received: Today Status: Further investigation required Next step: Progress / follow up VO: “The complaint has now been received. Hakim remains responsible for progressing it, even if further investigation involves another team.”	Complaint record with simple timeline: Receive → Log → Progress / Investigate → Follow up.	ABSORB — Introduces process, ownership and SLA in context rather than as an isolated definition.	—	Continue → IA-13
IA-13	Melissa asks what will happen next. Her tone is firmer now. She is not shouting, but she clearly expects Hakim to take responsibility.	Melissa: “So what happens now? I don't want to have to come back just to find out what's happening.” Hakim considers his response.	Medium two-shot. Melissa's expression is more impatient; Hakim remains composed.	CHALLENGE — Learner needs to manage expectations while maintaining ownership.	—	Continue → IA-14

Screen ID	Description	Voice-Over / Dialogue	Suggested Visual	CCAF / Learning Interaction	ACTION / CONSEQUENCES / JUDGMENT	Navigation / Branching
IA-14	Learner chooses how Hakim should respond.	A. “The issue needs further investigation. The relevant team will handle it from here.” B. “I understand you'd want to know what's happening. I'll follow up on the complaint and keep you informed of the progress and next steps.” C. “The investigation may take some time. If you don't hear anything, please come back and ask us for an update.”	Three response cards.	ACTIVITY / DO — Practise ownership, expectation management and follow-up communication.	A — ACTION: Hakim transfers the case to another team. CONSEQUENCE: Melissa may be left uncertain about who is responsible for progressing the complaint. JUDGMENT: Involving another team does not remove Hakim's ownership. B — ACTION: Hakim acknowledges the concern and commits to follow-up and updates. CONSEQUENCE: Melissa knows what will happen next and does not have to carry the responsibility for chasing the case. JUDGMENT: This is the strongest approach because it combines empathy, ownership and clear next steps. C — ACTION: Hakim asks Melissa to return if she does not hear anything. CONSEQUENCE: The responsibility for following up is placed on the customer. JUDGMENT: This weakens ownership and can create the “silence” the complaint-handling principles are designed to avoid.	A/B/C → choice-specific feedback → IA-15
IA-15	Hakim demonstrates the stronger approach. The complaint remains unresolved, but the interaction has been handled appropriately.	Hakim: “I understand that you'd like to know what happened to the RM60. I need to check this further, so I'll follow up on the complaint and keep you informed about the progress and next steps.” Melissa: “Alright. Thank you for explaining that.”	Two-shot. Hakim maintains professional eye contact. Melissa is still concerned but reassured by the clear next step.	FEEDBACK / MODEL — Learner sees effective complaint handling demonstrated in the complete interaction.	—	Continue → IA-16
IA-16	The learner sees the complete customer journey and the principles demonstrated through Hakim's interaction.	VO: “Notice what Hakim did throughout the conversation.” Recognise the concern → Understand what happened → Listen and recap → Respond honestly → Take ownership → Follow up and keep the customer informed	Animated journey showing the interaction from Melissa's arrival to the agreed next steps.	CONNECT — Learner connects the individual behaviours into one complaint-handling approach.	—	Continue → IA-17
IA-17	Reflection. Learner is invited to think about the situation before moving on.	VO: “Melissa did not arrive angry or use the word ‘complaint’. She simply noticed that RM60 was missing. What made this a complaint was her expression of dissatisfaction and need for the Bank to address her concern.”	Reflection screen with Melissa's opening statement beside the key takeaway.	CONNECT — Reinforces that complaints can be subtle and that recognising them early matters.	—	Continue → IA-18

Screen ID	Description	Voice-Over / Dialogue	Suggested Visual	CCAF / Learning Interaction	ACTION / CONSEQUENCES / JUDGMENT	Navigation / Branching
IA-18	Closing. Hakim documents and progresses the complaint.	VO: “Good complaint handling is not always about having an immediate answer. It is about understanding the customer's concern, responding appropriately, taking responsibility, and keeping the customer informed while the issue is being resolved.”	Hakim completing the complaint record. Final visual returns to the branch.	CONVERGENCE — Story concludes and transitions back to the wider learning journey.	—	Continue to next learning activity
